Codes, keywords & shortcuts

Quick reference for every stage. Keep this page beside the software; detailed code lists are on page 9.

Fast start

Password: admin@123 · OTP: 123456. Home → Configure demo → Use login. Add session keeps another account signed in; top-bar chips switch accounts. Demo tools → Script → S1…S5 → How to complete. These are on-screen shortcuts, not keyboard commands.

Read the script

S1–S5 stages: S1 registration; S2 offline work; S3 referrals; S4 job mela; S5 counselling + reports.

1.1, 2.7… checklist step numbers. Tick after showing the stated result.

C1–C5 configuration tasks: baseline field; site checklist; service clock; trade/vacancy; saved report.

P-01–P-08 persona = sample person; names are shown beside IDs on stage pages.

Q1–Q5 five standard MIS questions/reports (page 8).

D / D+n / D−n demo day / n days after / n days before. Use D shown in the app.

L1 / L2 first / second escalation level for overdue cases.

v1, v2… version number. Publishing creates a new configuration version.

SM-xx software module number. Full code directory: page 9.

Mxx / Txx / S_ master / transaction / script-support sheet prefixes. T09 = field-visit roster.

T-4 / RFP demonstration-pack label / Request for Proposal. Annexure-B is the evidence checklist.

→ / & / ↔ then open or move to / and / switch between.

Accounts and places

demo. demonstration account prefix.

op / ff / sup centre operator / field functionary / supervisor.

dlo / nodal District Labour Officer / departmental contact officer.

emp / cns employer / counsellor. **edu1** identifies education counsellor account 1.

pmu / admin Project Management Unit / configuration administrator; **state** = statewide role.

ntr / krs / gnt NTR district / Krishna / Guntur. Uppercase forms mean the same places.

cs / sk / ed / lb Civil Supplies / skilling / education / Labour service families.

ILAC-…-01 centre identifier; e.g. ILAC-KRS-01 = Krishna centre 01.

Record IDs: read the prefix

SYN synthetic/sample data, not a real person or establishment.

SYN-W / SYN-H worker / household. A household contains its head and family members.

SYN-M / SYN-E household member / employer.

SYN-S / SYN-V worksite / vacancy. **SYN-VIS** = site visit.

SYN-R / SYN-G service referral / grievance.

SYN-B / TR training batch / trade code.

SYN-C / SYN-CC counsellor / counselling case.

SYN-UIDTOK mock identity token; enter the complete supplied token.

SYN-UAN mock e-Shram Universal Account Number token.

SYN-…-ACK external acknowledgement from APSSDC, CS or EDU.

SYN-NCS / SYN-GSWS mock job-seeker / secretariat reference.

SYN-AVREF / SYN-EST mock identity-authentication reference / establishment registration number.

SYN/BOCW/… mock BOCW registration number.

PRV / DEV / SYNC provisional offline worker ID / device ID / sync-cycle ID.

JM / JMR / JMT job-mela event / event registration / event check-in token. JMR and JMT are different.

INT / OFR / PLC interview / offer / placement ID.

APT / TSK / DOC appointment / follow-up task / document ID.

MSG / API / CFG / rpt message / API-log entry / configuration change / saved report ID.

RET / ACK queued retry / acknowledgement ID.

XXXX-XXXX-nnnn masked Aadhaar; last four digits only. Use the supplied mock values.

What the screens mean

Registry / baseline existing worker records / starting household information.

Dependant / consent linked family member / recorded agreement to stated purposes.

Referral / service clock request sent to a department / allowed time to complete it.

Fallback / pendency manual route after API failure / work still pending.

Sync / outbox / conflict send and receive changes / changes waiting to send / competing edits needing a decision.

Audit / gateway / mock action history / message log / simulated external service.

As loaded / live original dataset before demo changes / current working data.

Organisations and common terms

ILAC Integrated Labour Amenities Complex.

AP / GoAP Andhra Pradesh / Government of Andhra Pradesh.

BOCW Building and Other Construction Workers.

APBOCWWB Andhra Pradesh Building and Other Construction Workers Welfare Board.

APSSDC Andhra Pradesh State Skill Development Corporation.

UID / UIDAI Unique Identification / Unique Identification Authority of India.

e-Shram / NCS unorganised-worker registry / National Career Service.

GSWS / CSC village/ward secretariat system / Common Service Centre.

MIS / KPI Management Information System / Key Performance Indicator.

DOB / OTP / MFA date of birth / one-time password / multi-factor authentication.

PPE / LPG / ITI personal protective equipment / liquefied petroleum gas / Industrial Training Institute.

SMS / IVR Short Message Service / Interactive Voice Response.

QR / CSV / PDF Quick Response code / comma-separated values / Portable Document Format.

IEC / RPL / SHG Information, Education and Communication / Recognition of Prior Learning / Self-Help Group.

PGRS / NIPUNYAM public grievance redressal system / named skills programme.

MeeSeva / Udyam citizen-service platform / enterprise-registration service.

IST / ₹ / INR India Standard Time / Indian rupee / Indian rupee currency code.

API and evidence vocabulary

API / HTTP Application Programming Interface / request-response protocol.

GET / POST / CALLBACK read status / submit data / external status update.

200 / 201 / 202 successful response / record created / request accepted.

503 / timeout / UP / DOWN service unavailable / no reply in time / available / unavailable.

JSON / YAML structured data formats for API logs and specifications.

SHA-256 / hash cryptographic fingerprint for audit/document integrity.

AES-256-GCM / IV device encryption method / per-encryption initialisation value.

Cipher / checksum encrypted data / fingerprint used to detect changes.

Accounts, people & running order

All names and numbers below are synthetic. Names accompany persona IDs again on the relevant stage pages.

Before you begin

1. Open index.html, or the already-running local app. Use English labels for this guide.

2. Readiness Demo tools → Readiness: confirm 3,684 records in 22 sheets. Check D. Rebase & reload and Reset all demo data clear demonstration changes; use only when starting afresh.

3. Sign in Home footer → Configure demo → Use login beside the required account. Username and demo password fill automatically. Continue → OTP 123456 → Verify and sign in.

4. Rehearsal shortcut Demo tools → Script → choose scenario → Quick-switch. It skips password/OTP; use normal sign-in to demonstrate step 1.1.

5. Follow order S1 + C1 → S2 + C2 → S3 + C3 → S4 + C4 → S5 + C5. Added records receive generated IDs; write down the actual acknowledgement IDs.

6. Keep work Current build saves working data and drafts across reloads. Avoid Reset/Rebase during a run. Keep the same tab for the full offline demonstration.

7. Show evidence Close the drawer with × to operate the screen. Reopen Demo tools for logs. Checklist ticks can appear before every part is shown; verify the stated result before ticking this paper copy.

What each Demo Tools tab shows

Script S1–S5 checklist, quick-switch, How to complete.

Personas all exact values for P-01–P-08.

Gateway SMS/WhatsApp/IVR text; messages are logged only.

API log mock request, response, status and time.

Audit who changed what; Verify chain checks integrity.

Sync device outbox, sync history and encrypted store.

Config published versions, dates and change history.

Mocks Civil Supplies 503; P-03 e-Shram timeout (10 s or rehearsal 3 s); APSSDC callback.

Readiness dataset counts, demo day and reset controls.

Accounts available in Configure demo

Account	Use it for
demo.op.ntr	Operator (assisted desk)
demo.op.krs	Operator (assisted desk)
demo.op.gnt	Operator / Job-mela desk
demo.ff.krs	Field Functionary (mobile, offline-capable)
demo.sup.krs	Centre Supervisor (conflict resolution)
demo.dlo.krs	District Labour Officer (escalation L1)
demo.dlo.gnt	District Labour Officer / Job-mela organiser
demo.nodal.cs	Departmental Nodal Officer - Civil Supplies
demo.nodal.sk	Departmental Nodal Officer - APSSDC
demo.emp.001	Employer user
demo.cns.edu1	Education Counsellor
demo.pmu.state	State PMU analyst (MIS)
demo.admin.state	Configuration administrator

People at a glance

ID / name	Use
P-01 — Kona Venkata Ramana	New full registration • S1
P-02 — Gorle Laxmi → existing Gorle Lakshmi	Duplicate: SYN-W-000607 • S1

Page map

S1: pages 3–4 · S2: page 5 · S3: page 6 · S4: page 7 · S5: page 8 · code directory: page 9.

Assisted registration

Start account: demo.op.ntr • Centre: ILAC-NTR-01 • Checklist 1.1–1.8

P-01 — Kona Venkata Ramana

Male · DOB 1984-06-12 · mobile 9000099011. Telugu: కోన వెంకట రమణ. Mason; 14 years; bank Yes; smartphone Yes. Masked Aadhaar **XXXX-XXXX-4821**; UID **SYN-UIDTOK-41100011**. Use the P-01 helper where offered.

☐ 1.1 Sign in and show the menu

Account: demo.op.ntr → Staff login

1. Use login (page 2), Continue, OTP **123456**, Verify and sign in. **2.** Show the operator menu. Click **తెలుగు**, then **English** to switch back.

Check: Queue & tokens, Workers and Register worker are available. OTP sign-in records the login step.

☐ 1.2 Issue and call the token

Queue & tokens

1. Click **P-01** (Kona Venkata Ramana). Keep New worker registration and Telugu. Click **Issue token**. **2.** Click **Call** on his token, or Call next when first in queue.

Check: Now calling shows his name/token. Gateway contains the token message.

☐ 1.3 Check the registry first

Called token → Start registration → Registry check

1. Click **P-01** (Kona Venkata Ramana); confirm UID token above. **2.** Click **Search BOCW registry & verify e-Shram**; wait. Click **Continue to details**.

Check: BOCW: No match. e-Shram: Verified, UAN SYN-UAN-77810011. Requests are in API log.

☐ 1.4 Demonstrate missing-DOB validation

Personal & work details

1. Keep **leave DOB blank** checked; click **P-01** (Kona Venkata Ramana), then **Save & continue**. **2.** Show “Date of birth is required”. Enter **1984-06-12** and save again.

Check: The form rejects the missing date, then advances to Consent.

☐ 1.5 Record consent

Consent

1. Select the four purposes. Review **CONSENT-DEMO-v1** and the read-aloud Telugu channel. **2.** Tick the agreement and click **Record consent & continue**.

Check: Purposes, notice version, channel and timestamp are recorded.

☐ 1.6 Fill the household

Household baseline

1. Click **Fill P-01 household** for Kona Venkata Ramana. Compare the values and four members below. **2.** If C1 was already published, also select Primary language of worker. Click **Save baseline & continue**.

Check: Main fields fill correctly; four family members are present. The registering worker is the head, making five people in total.

P-01 — household baseline

Area **Urban**; house **Semi-pucca - own**; rice card **Yes**; water **Public tap**; LPG **Yes**; migration **None**; household language **Telugu**.

Member / relationship	DOB / education
Kona Padma • Spouse	1988-09-02 • Class 10 completed; Home-maker
Kona Sai Kiran • Son	2009-01-15 • Intermediate (Class 11–12); Student
Kona Harika • Daughter	2011-12-03 • Secondary (Class 9–10); Student
Kona Sathyavathi • Mother	1958-05-20 • No formal schooling; Home-maker

☐ 1.7 Attach the two specimens

Documents

1. Click **Attach P-01 specimens** for Kona Venkata Ramana. **2.** Check Photograph and Work certificate (90 days), with the restricted-access label. Click **Continue to review**.

Check: specimen_photo_P-01.png and specimen_work_certificate_P-01.png are listed.

☐ 1.8 Submit and show acknowledgement

Review & submit

1. Review the record and click **Submit registration**. Note the worker ID and household ID. **2.** Use **Print acknowledgement** if required, then **Show gateway log**.

Check: Acknowledgement and Telugu registration message appear. The first new worker is normally SYN-W-000610 on a fresh dataset; use the actual generated ID.

Duplicates, timeout & configuration

Continue as demo.op.ntr; switch to demo.admin.state only for C1.

P-02 — Gorle Laxmi

Typed name **Gorle Laxmi**; existing registry spelling **Gorle Lakshmi**.
Female; DOB **1990-03-14**; mobile **9000099021**; UID **SYN-UIDTOK-90047846**. Persona masked Aadhaar **XXXX-XXXX-3307**. Existing worker **SYN-W-000607**; household **SYN-H-000531**. Some existing-record details differ deliberately: compare the duplicate, then link.

☐ 1.9 Link the duplicate

demo.op.ntr → Register worker → Registry check

1. After the P-01 acknowledgement, click **Register another worker**. Select **P-02** (Gorle Laxmi). **2.** Run the registry search. Compare the flagged SYN-W-000607 record (Gorle Lakshmi). **3.** Click **Same person — link to existing record**. Inspect Demo tools → Audit.

Check: Existing worker opens; no second worker is created. Audit says Duplicate resolved by linking.

P-03 — Pydi Simhachalam

Male; DOB **1996-10-30**; mobile **9000099031**; trade **Centring / Shuttering worker**; 5 years; bank Yes; smartphone Yes.
Masked Aadhaar **XXXX-XXXX-9014**; UID **SYN-UIDTOK-41100031**.
Baseline: Urban; Rented; rice card No; water Public tap; LPG No; migration Inter-district; language Telugu. Single-member household.

☐ 1.10 Continue despite external timeout

demo.op.ntr → Register worker; Demo tools → Mocks

1. Keep **e-Shram gives no response for P-03** enabled. Timeout is 10 s; choose 3 s only for rehearsal. **2.** Open Register worker after linking the duplicate. Click **P-03** (Pydi Simhachalam), search, wait for timeout, then Continue to details. **3.** Untick **leave DOB blank**, click **P-03** again, and Save & continue. **4.** Select consent purposes and agree. Use **Fill P-03 household**, save; **Attach P-03 specimens**, review; **Submit registration**.

Check: Acknowledgement shows Pending - external system unavailable, with documented next step. Retry is queued; specimen_photo_P-03.png is attached. API log records the failed verification.

☐ C1 Publish a mandatory language field

demo.admin.state → Configuration console → Baseline form (C1)

1. Use **Add session**: choose demo.admin.state, password admin@123, OTP 123456. **2.** Click **Fill C1 values**. Check label **Primary language of worker**; Type Dropdown; options **Telugu, Urdu, Odia, Hindi, Other**; Mandatory checked. **3.** Click **Publish new version**. Inspect **Change log** or Demo tools → Config. **4.** Switch to demo.op.ntr using the account chip. On the next registration, reach Household baseline and show the new required dropdown and version.

Check: First change is v2. Published field appears without a new build. If already present, inspect it instead of publishing a duplicate.

Before moving to S2

Use Demo tools → Script → S2 → Quick-switch, or Add session as demo.ff.krs. Keep earlier sessions signed in for later demonstrations. Do not reset the dataset between scenarios.

Offline visit & synchronisation

Start: demo.ff.krs • Site SYN-S-0006 • Keep the same browser tab and switch accounts with session chips.

P-04 — Gudla Eswar

Male; DOB **2001-02-17**; mobile **9000099041**; Helper / Unskilled worker; 2 years; bank No; smartphone Yes. Masked Aadhaar **XXXX-XXXX-6620**; UID **SYN-UIDTOK-41100041**. Use **Fill P-04**; camera uses specimen_photo_P-04.png.

☐ 2.1 Download the visit online

demo.ff.krs → Field app (Android)

1. Wait for secure storage to unlock. Keep Airplane mode off. **2.** Click **Download visit & 12-worker roster**.

Check: SYN-VIS-001 opens for site SYN-S-0006, Apartment project - Krishna 06.

☐ 2.2 Prove offline mode

Phone status bar; Committee verification

1. Click **Airplane** to turn it ON, then **Test connection**. **2.** Keep it ON through step 2.7.

Check: Platform unreachable / no network appears. This is the simulated phone switch, not the computer's Wi-Fi.

☐ 2.3 Record all attendance

Phone → Roster

1. Click **Apply T09 attendance**. **2.** Check Bolla Ramu (SYN-W-000182) and Doddi Raju (SYN-W-000225) show A; the other ten show P.

Check: 12 original workers recorded: 10 Present, 2 Absent; queued locally.

☐ 2.4 Save safety evidence

Phone → Safety

1. Enter "Toolbox talk held; harness use reviewed." **2.** Keep the specimen photograph and click **Save observation**.

Check: Saved card shows photo and location coordinates/accuracy/status.

☐ 2.5 Record three skilling needs

Phone → Skilling

1. Click **Apply T09 skilling needs**.

Check: Needs enabled for Nalli Jyothi (SYN-W-000030), Anumolu Lavanya (SYN-W-000097) and Bolla Kumari (SYN-W-000183).

☐ 2.6 Register P-04 — Gudla Eswar offline

Phone → Register

1. Click **Fill P-04**, review values above, tick consent and click **Save on device (encrypted)**. **2.** Show the roster and Device storage panel, or Demo tools → Sync.

Check: A PRV- provisional ID, encrypted worker record and queued worker_create change appear.

☐ 2.7 Create two competing mobile edits

demo.ff.krs → Roster; then demo.op.krs → Workers

1. Offline: Edit mobile for **Pallapu Gopi — SYN-W-000120**; set **9000099101**; Save on device. **2.** Add session as **demo.op.krs**. Search/open SYN-W-000120. Edit mobile number → **9000099102** → Save change.

Check: Device and centre hold different mobile values for the same worker.

☐ 2.8 Reconnect and sync

Switch to demo.ff.krs → Field app → Sync

1. Turn Airplane mode OFF; wait for automatic sync. Use **Sync now** if another cycle is needed. **2.** Inspect queue results and the P-04 (Gudla Eswar) worker_create result.

Check: P-04 gets a permanent SYN-W- ID and server duplicate-check result. The mobile conflict is held for review.

☐ 2.9 Resolve the conflict with a reason

demo.sup.krs → Conflicts & identity review

1. Add session as supervisor. Find Pallapu Gopi, SYN-W-000120; compare both mobiles. **2.** Choose the incoming/device value **9000099101**. Reason: "Verified with the worker on site." Click **Resolve with reason**.

Check: Resolved status, selected mobile and reason. Audit preserves both edits and resolution.

☐ 2.10 Show visit history and skilling groups

demo.ff.krs → Skilling groups; demo.sup.krs → Workers

1. Show the three synced needs in Skilling groups. To group, select workers, choose Add selected to batch, then **Group into batch**. **2.** As supervisor, open Chilakala Durga Prasad (SYN-W-000004) → Site visits / Timeline.

Check: Visit history exists and synced needs are available for grouping/referral.

☐ C2 Publish and pull a new checklist item

demo.admin.state → Configuration console → Site-visit form (C2)

1. Click **Fill C2 values → Publish new version**. Label: PPE – safety helmets available on site (Yes/No). **2.** Switch to demo.ff.krs with the visit downloaded. Online: Sync → **Sync now**; wait, then open **Checklist** and answer Yes/No.

Check: Device receives the new form version and item without an app update.

Convergence referrals & fallback

Start: demo.op.krs • Keep Civil Supplies down until the fallback and monitoring evidence is shown.

P-05 — Bandaru Nagaraju

Existing worker **SYN-W-000608**; household **SYN-H-000532**; mobile **9000099051**.
Add newborn **Bandaru Likhitha**, Daughter, Female, DOB = **D−60 days**, with specimen_birth_certificate_P-05.png. Do not create another worker for the father.

☐ 3.1 Show the earlier service history

demo.op.krs → Workers

1. Search/open **SYN-W-000608 — Bandaru Nagaraju (P-05)**. Choose **Timeline**.

Check: Earlier LB-01 renewal is Completed - service delivered.

☐ 3.2 Add the newborn and certificate

Same worker → Household

1. Click **Add member**. Enter Bandaru Likhitha; Daughter; Female; DOB D−60. **2.** Choose specimen_birth_certificate_P-05.png and **Add to household**.

Check: New member and certificate are recorded for the rice-card referral.

☐ 3.3 Submit both services together

demo.op.krs → Convergence referrals

1. In Demo tools → Mocks, keep **Civil Supplies returns 503** checked. **2.** Close tools. **Raise referral** → worker SYN-W-000608 (Bandaru Nagaraju) → select **SK-01 and CS-01 together** → **Submit referral(s)**.

Check: SK-01 is API-routed, with external APSSDC acknowledgement and 7-day clock.

☐ 3.4 Show the manual fallback

Same paired acknowledgement → CS-01 row

1. Inspect CS-01: Manual / assisted, API unavailable, 21-day clock. **2.** Use **Referral slip** to inspect the printable slip; inspect Civil Supplies 503 in API log.

Check: Automatic fallback creates a departmental worklist entry. Do C3 only after this 21-day example.

☐ 3.5 Show one acknowledgement for both

Acknowledgement immediately after step 3.3

1. Before closing it, show both IDs, clocks, due dates, responsible offices and next steps; use **Print** if needed. **2.** Check the Telugu referral message in Gateway.

Check: One acknowledgement contains both referrals. Do not create the pair twice; if already closed, review the gateway message and existing cases.

☐ 3.6 Record departmental receipt

Add session: demo.nodal.cs → Departmental worklist

1. Find the new CS-01 case for Bandaru Nagaraju. Click **Update**. **2.** Choose **Received – documents verified**, enter remarks, optionally attach specimen evidence; **Record update**. Open the case.

Check: Department status/history and evidence appear. Without a file, this status records a manual document-verification entry.

☐ 3.7 Confirm the training seat

Demo tools → Mocks

1. For the new SK-01 enrolment, click **Send "Seat confirmed"**. **2.** As demo.op.krs, reopen its case in Convergence referrals. **Poll APSSDC status** is also available in the case.

Check: Seat confirmed appears, with callback/status evidence in the API log and case history.

☐ 3.8 Show pre-existing overdue escalation

demo.dlo.krs → Pendency & escalations

1. Add session as DLO. Find **SYN-R-00151 → Open**. **2.** Show creation D−25, 21-day clock, L1 at day 14 to DLO, and L2 at day 21 to State PMU.

Check: Overdue status and both escalation levels are visible.

☐ 3.9 Show the failed integration

demo.op.krs → Integration monitoring

1. Keep Civil Supplies 503 enabled. Show health, failed call/retry records and **Open dependency**.

Check: Civil Supplies is DOWN; the error and unresolved dependency remain visible.

☐ C3 Change clocks for new referrals

demo.admin.state → Configuration console → Service clocks (C3)

1. Edit CS-01. Set **clock 15, L1 10, L2 15** days. Applies to: New referrals only. **Publish new version**. **2.** Inspect Change log. As DLO, reopen SYN-R-00151 and compare its original 21-day clock.

Check: New cases use 15/10/15; existing cases keep 21/14/21. L1 must be less than L2, and L2 must not exceed the clock.

Job mela & placement

Start: demo.op.gnt • JM-2026-01 • Use demo.emp.001 for the employer's offer.

P-06 — Kandula Rajesh

Male; DOB **1993-04-08**; mobile **9000099061**; Mason; 9 years; bank Yes; smartphone Yes. Telugu **కందుల రాజేష్**. Masked Aadhaar **XXXX-XXXX-1188**; UID **SYN-UIDTOK-41100061**. Photo: specimen_photo_P-06.png.

P-07 — Anumolu Raju

Existing worker **SYN-W-000302** • registration **JMR-004** • check-in token **JMT-004** • mobile **9000005754** • QR payload **JM-2026-01|JMR-004**. Trade: Bar bender.

☐ 4.1 Show event setup

demo.op.gnt → Job mela → Event

1. Review **JM-2026-01**, venue ILAC-GNT-01, 10:00–16:00, capacity 300, six employers and 12 original vacancies. **2.** Open **Shared calendar** and find the event on D.

Check: Event and calendar match. Vacancy count increases after C4.

☐ 4.2 Check in P-07 — Anumolu Raju

Job mela → Candidates & check-in

1. Choose Mobile number; enter **9000005754**; **Find candidate**. Alternatively choose Token or QR and enter the matching value above. **2.** Review eligibility; tick document sighted; **Confirm check-in**.

Check: JMR-004 is Checked in. QR check-in accepts the payload text; there is no camera scan.

☐ 4.3 Register P-06 — Kandula Rajesh

Job mela → Walk-in registration

1. Click **P-06** (Kandula Rajesh), run registry search; No match → **Continue to details**. **2.** Enter the P-06 values above; Save & continue. Select consent purposes and agree. **3. Attach P-06 specimens** → Continue to review → Submit registration. **4.** On acknowledgement, **Register for JM-2026-01 & check in**; tick document check; Confirm check-in.

Check: Worker record, NCS reference, event registration and Checked in status. New event registration is usually JMR-021 on a fresh run.

☐ 4.4 Allocate two interviews

Job mela → Candidates & check-in

1. P-06 (Kandula Rajesh): **Allocate slot** → **SYN-V-0001**, **SYN-E-001 — Godavari Constructions** → available time → Allocate. **2.** P-07 (Anumolu Raju): allocate **SYN-V-0006**, **SYN-E-006 — Amaravati Civil Works**.

Check: Both candidates appear under Interviews with the correct employer/vacancy.

☐ 4.5 Record the spot offer

demo.emp.001 → Employer workspace

1. Add session as employer. For **P-06 — Kandula Rajesh**, click **Review & offer**. **2.** Review wage (vacancy default ₹850/day), engagement (Long-term contract, 6+ months), duration (default 90 days); set joining **D+3**. Click **Record spot offer**.

Check: Offer stores wage, engagement and joining date; placement and joining task are created.

☐ 4.6 Record the pending outcome

demo.op.gnt → Job mela → Interviews

1. For **P-07 — Anumolu Raju**, **Record outcome** → Employer decision pending → follow-up **D+2** → **Save outcome**.

Check: Pending decision and follow-up task are recorded.

☐ 4.7 Show placement and notification

demo.op.gnt → Placements & follow-up

1. Find **Kandula Rajesh (P-06)**; show offer link and joining date. **2.** Show the joining task in Shared calendar and the offer notification in Gateway.

Check: SM-05 placement, joining follow-up and worker message all exist.

☐ 4.8 Show live totals and export

Job mela → Live dashboard

1. Review registrations, check-ins, interviews, spot offers and pending outcomes. **2.** Click **Export closure report (CSV)**.

Check: Totals reflect the actions; closure report downloads.

☐ C4 Publish a trade and vacancy

demo.admin.state → Configuration console → Trades & vacancies (C4)

1. Enter **Solar panel installer** → Publish. **2.** Choose **SYN-E-002 — Krishnaveni Buildcon** and the new trade. Defaults: 5 positions, ₹950/day, 1 year experience, Short-term contract. Click **Publish vacancy to JM-2026-01**. **3.** As demo.op.gnt, inspect the new vacancy in Job mela → Event.

Check: New trade and vacancy are immediately available. Reuse the trade if already published.

Counselling & management reports

Start: demo.cns.edu1 • Switch to demo.pmu.state for MIS and demo.admin.state for C5.

P-08 — Bonthu Sravani

Student **SYN-M-001909**; household **SYN-H-000533**; Class 10 passed - not enrolled. Father **SYN-W-000609 — Bonthu Srinivasa Rao**; phone **9000099081**. Counsellor **SYN-C-01 — Kolli Sujatha**, account demo.cns.edu1. Specimen: specimen_class10_memo_P-08.png.

☐ 5.1 Open the student record

demo.cns.edu1 → Education counselling

1. Search **SYN-M-001909** (Bonthu Sravani, P-08) → **Open**.

Check: Household, linked father and education stage are shown.

☐ 5.2 Book an appointment

Student record → Book an appointment

1. Choose an available slot for **Kolli Sujatha (SYN-C-01) → Book & send reminder**. **2.** Review Shared calendar and Gateway.

Check: Booking and Telugu reminder exist. Choose an offered future slot; availability is Mon/Wed/Fri, 10:00–16:00.

☐ 5.3 Record the counselling session

Record counselling session

1. Assessment: “Strong Class 10 result; interested in construction and design.” Interests: **Engineering / construction**. **2.** Advice: **Polytechnic – Diploma in Civil Engineering**. Actions: “Collect documents; apply to Polytechnic counselling; scholarship application.” **3.** Notes: “Family prefers a campus close to home.” Optionally attach Class 10 specimen → **Save session**.

Check: Saved advice/actions and access-restricted notes appear under Sessions & cases.

☐ 5.4 Raise the two education referrals

Student record → Referrals

1. Keep **ED-02 Admission facilitation** and **ED-01 Scholarship facilitation** checked → **Raise referral(s)**.

Check: ED-02 is manual, 15-day clock; ED-01 is API, 30-day clock with acknowledgement. Both link to Bonthu Sravani (P-08).

☐ 5.5 Set follow-up

Student record → Follow-up

1. Date **D+14**; note “Review admission and scholarship progress” → **Set follow-up**. **2.** Review the case and Household timeline.

Check: Case, referrals and follow-up appear on the dependant/household history.

☐ 5.6 Drill down the dashboard

demo.pmu.state → MIS & reports → Dashboard

1. Add session as PMU. At State level, **Drill down** into Krishna, then a centre. **2.** Use the State/district breadcrumbs to go back.

Check: Scope changes State → district → centre, ending with centre-level trade counts.

☐ 5.7 Answer all five MIS queries

MIS & reports → Standard reports

1. Set **Data as of → Report default**. Open all five reports below, one at a time. **2.** Read each table, total, scope and reporting timestamp.

Check: Q1/Q3/Q5 use As loaded; Q2/Q4 use current data as on D. All five are demonstrated.

Query	What to show
Q1	Active women by district; top 5 + statewide total. Fresh baseline: **176**; top five Kakinada 15, Srikakulam 14, Kurnool 11, Palnadu 11, Krishna 10.
Q2	Open referrals past due, by department. Fresh baseline **54**; live actions can change this.
Q3	JM-2026-01 pre-registered candidates by trade, before demo registrations; **20** total.
Q4	Open grievances older than 30 days by category. Fresh baseline **26**.
Q5	Krishna active workers needing skills, not in a batch, before S2: Tile layer, Plasterer, Electrician, Bar bender — **1 each**.

☐ 5.8 Export the result

Standard reports → selected report

1. Click **Export CSV**. Open the download.

Check: Reporting timestamp, scope and aggregated counts are present; no worker IDs/mobile numbers.

☐ C5 Save and pin a custom report

demo.admin.state → MIS & reports → Report builder

1. Dataset Workers; Group by (1) Primary trade; Group by (2) District; Filter 1 Gender. **2. Run report** to populate values; choose **Female**; Run report again. **3.** Report name **Women workers by trade and district**; keep **Add to PMU dashboard** checked; **Save report**. **4.** Switch to demo.pmu.state → Dashboard.

Check: Saved report is in Standard reports and appears as a pinned PMU report.

If you get stuck

Cannot see a menu? Use the account listed for the step; each role has different access.

Household autofill? Use the persona helper in Personal & work details first, then Fill P-01/P-03 household. New mandatory C1 fields must also be answered.

No seat callback? Create the SK-01 referral first; already-confirmed cases disappear from the awaiting-seat list.

No sync? Download the visit online, capture offline, then turn Airplane mode off. Keep the same tab for field-device work.

Already used a person? Existing registrations can trigger duplicates. Continue the saved run or intentionally start a fresh rehearsal via Reset; reset clears changes.

No acknowledgement dialog? Use Gateway and the existing case records. Do not repeat the referral submission merely to recreate the dialog.

Source: local Demo Tools script and current screen handlers (js/demo/script.js, tools.js, auth.js and views-*.js), dataset v1.0 CSV sheets and data/modules.json. Prepared 16 October 2026. This describes the local prototype; mock API calls/messages are simulated.
